2015-2016	SSLC
91.2%	Don Bosco High School-Lalgudi 06/2015 - 03/2016

Personal Projects

2020	Web Page Designing (Mini project): (07/2020-11/2020) The aim of the project is to create the web page for college by using HTML 5 and CSS 3 with the help of software called "Visual Studio". By doing this project, I made the web page more user-friendly and easily accessible
2021	E-Commerce Website: (01/2021-05/2021) The main purpose of the project is to create an E-Commerce Website by using HTML 5 and CSS 3 with the help of software called "Visual Studio".
2023	Web-Based food delivery system: (01/2023-05/2023) Making sure that passengers have access to wholesome meals while traveling is quick and easy with the web-based food ordering system. Currently, food orders are processed manually by the railway system. Order processing is difficult and errors are produced as a result. In order to do this, we've integrated a system that will take the place of the current manual ordering system. The user will receive relevant food items from our Food Order in Train System for Railways.
